SUMMARY

Experienced Full Stack Laravel Developer with over 2 years of experience, including positions at Roshni Technologies and Apollo Telecom Pvt Ltd. Skilled in developing and maintaining web applications using PHP and Laravel.

Proficient in integrating front-end and back-end systems, enhancing performance, and improving user experience through effective collaboration with teams. Strong foundation in client management and a robust technical skill set including jQuery, AJAX, Object-Oriented PHP, SQL schema design, API development, MYSQL profiling, Bootstrap, HTML5, and CSS.

EXPERIENCE

Full Stack Laravel Developer

Roshni Technologies

April 2024 - Present, Abu Dhabi, United Arab Emirates

- Developed and maintained web applications using PHP, WordPress, and Laravel. Ensured seamless integration between front-end and back-end systems. Collaborated with teams to enhance performance and user experience.

Full Stack Laravel Developer

Apollo Telecom (Pvt) Ltd

January 2023 - February 2024, Islamabad, Pakistan

- Spearheaded Laravel development projects at Apollo Telecom, contributing to the success of key initiatives.
- Demonstrated proficiency in Laravel framework, leveraging it to create robust and scalable software solutions. Collaborated with cross-functional teams to troubleshoot and resolve software issues, reducing system downtime by 20% and enhancing overall software reliability.

PROJECTS

Garments Store E-commerce Platform

Tailored for UAE Client • alazharcreator.com/ • April 2024 - April 2024

- Developed a robust e-commerce platform featuring product listings with multiple images, categories, social media integration, and a responsive design for all devices. Implemented an admin panel enabling CRUD operations, password recovery, and new admin creation.

Pet Store E-commerce Platform - KIMBOWNY

Tailored for UAE Client • kimbownypetstore.com/ • December 2023 - January 2024

- Established KIMBOWNY, a professional pet shop website with secure payment methods, referral system, user-friendly interface, responsive design for all devices, admin panel for CRUD operations, social media integration, and multiple images per product.

Feedback Tool Application Development

IKONIC • github.com/nabeelimrani/feedback-tool.git • December 2023 - December 2023

- Developed the Feedback Tool Application with a user-friendly interface to streamline feedback processes. Implemented features for collaboration, including comment viewing and mentions, to enhance interactive feedback experiences for users.

Hardware Tools Shop - AlazharGT

Tailored for UAE Client • alazhargt.com/ • November 2023 - December 2023

- Established and managed AlazharGT, a hardware tools shop website, resulting in a 30% increase in sales. Developed a robust web platform in English and Arabic translations, enhancing customer experience, efficiency, and engagement.

Graphics & Printing Shop Inventory System

Tailored for Pakistan Client • github.com/nabeelimrani/Graphics_Printing_Shop.git

- October 2023 - November 2023
- Created a comprehensive inventory system specifically tailored for the shop owner's accounting needs, providing real-time tracking of stock levels, facilitating seamless order processing, and ensuring accurate record-keeping for efficient business operations.

Automated Exam Hall Seating Management System

Academic Institutions in India • github.com/nabeelimrani/Exam_Hall_Seating_System.git

- October 2023 - October 2023
- Developed an Automated Exam Seating System to streamline seating arrangements for exams in Indian academic institutions. The system listed exams for students, allocated seats based on class, row, and roll number, assigned halls and rooms to teachers, and generated roll numbers for students in specific halls, rooms, and seats.

Vineyard Wine Shop E-commerce Platform

Tailored for Indian Client • github.com/nabeelimrani/Vineyard-Wine-Shop-Website.git • August 2023 - August 2023

- Developed an engaging e-commerce platform for a Vineyard Wine Shop, featuring a diverse collection of wines. Implemented product listings with detailed descriptions and pairing insights to provide wine aficionados with a curated online shopping experience.

Recovery Management System Development

Apollo Telecom Pvt Ltd • January 2023 - April 2023

- Collaborated with Apollo Telecom Pvt Ltd to develop the Recovery Management System (RMS), which facilitated property installment collection and rider recovery operations. Designed separate modules for property installment tracking and rider recovery, enabling efficient monitoring and messaging for riders during recovery operations.

E-Commerce Website Development (Laravel & jQuery)

Final Year Project • github.com/nabeelimrani/Online-Shopping-Website.git • October 2022 - December 2022

- Developed an E-Commerce website using Laravel and jQuery, enhancing product visibility and user engagement. Independently executed the end-to-end development process. Implemented responsive design features, leading to increased mobile user interactions and sales.

EDUCATION

Bachelor of Science in Computer Science

Gomal University • Dera Ismail Khan, Pakistan • 2022 • 3.89 GPA

Intermediate in Pre-Engineering

Minor in Mathematics • Punjab Group of College • Dera Ismail Khan, Pakistan • 2018

CERTIFICATION

MERN/MEAN Stack Development Bootcamp

Issued by: Techlift Program • 2023

- This bootcamp provided comprehensive training in modern web development technologies, enhancing skills in MongoDB, Express.js, React.js, Node.js, and Angular. It complements my full stack development expertise by broadening my proficiency in JavaScript frameworks and enabling me to build and maintain robust, scalable web applications.
-
